Subject: RE: Use of TCE, PCE, Carbon Tetrachloride and Methylene Chloride in Refrigerant Manufacturing, Meeting with Arkema and EPA

Good Afternoon,

Please see the agenda for tomorrow, the main focus of the discussion will be on the TSCA existing chemicals tomorrow while also noting the impacts on other EPA programs.

Agenda

1. Introductions
2. Purpose
3. Discussion
 - a. TSCA feedstock chemicals (TCE and MC) and associated HFCs
 - b. Alternatives to TSCA feedstock chemicals
 - c. Other possible changes due to AIM Act
4. Next steps

Thanks!

Katie McNamara

Dear Doug,

Following up on our virtual meeting with the Alliance for Responsible Atmospheric Policy, Arkema would like to meet with EPA to discuss our use of chlorinated feedstocks for the manufacture of fluorogases and the anticipated impact of the AIM Act on our activities.

We currently use DCM and TCE, and submitted a substantial quantity of use and exposure information to the Agency during the Risk Evaluation process. We have also announced plans to manufacture a HFO at our Calvert City, KY plant, for which we plan to use a chemical not currently on the TSCA inventory.

We therefore request that the meeting include someone from the New Chemicals branch (our EHS person suggested Madison Lee) and someone from the Air Office (Ozone Protection – Cindy Newberg's team).

Please give us a few options in the first half of September to have the right team(s) available.

Best Regards,

Allen KARPMAN

Director, Government Affairs, Fluorochemicals Americas
